Professional Pro-DJ Stands

Pioneer are proud to launch a new range of plates and brackets designed to compliment the current PRO-DJ product range. The supports are both solid and durable, incorporating a weighted balanced design with a powder coated finish. Product longevity and space within the DJ booth is maximised by the tailored fit each stand gives to it's partnering product. Well thought out specification includes anti-vibration pads, six fixing holes with supplied screws as well as height and plate angle adjustment. Owners of the existing Pioneer base brackets for use with the CDJ-500-S will be pleased to know it is compatible with all the latest plates supporting the new models. Other design features, such as cable management through the stem of the bracket and space for heat dissipation, prove that Pioneer offer the best long-term solution for your Pioneer PRO-DJ products.

Features and specifications of the products described or illustrated in this catalogue are correct at the time of printing but could change as production changes might occur. This catalogue may contain typographical errors and the colours of the depicted products may deviate slightly from reality. Consult your Pioneer dealer to ensure that actual features and specifications match your requirements. This catalogue may contain references to products that may or will not be available in your country. Pioneer is not liable for any damage or injury caused by incorrect installation or improper use.
